

Question Five

Founded in 2012, Jumia, often referred to as the "Amazon of Africa," is an online marketplace catering for multiple countries across Africa. The company sought to tap into the rising internet penetration, the vast population, and an underserved market that lacked robust e-commerce infrastructure. Unlike global giants like Amazon or Alibaba, which cater for regions with well-established infrastructure and internet connectivity, Jumia faced unique challenges in Africa, which slowed its anticipated vast growth. In Uganda, Jumia has been recognized as the biggest e-commerce platform offering a wide range of products and services such as electronics, fashion clothes, shoes, food, travel agency for online tickets, houses, motor vehicles and providing logistics for their own deliveries to their consumers.

Required;

- Discuss the different innovations that Jumia had to undertake to transform Uganda's e-commerce sector to propel them to the success registered so far. [12 Marks]
- Explain the key challenges that Jumia faces in its quest to create an omnichannel service to improve customer satisfaction in the Ugandan market place. [8 Marks]
- Differentiate between Credit payment and Cash on Delivery and how they are used by e-commerce companies such as Jumia. [5marks]

Question Six

Currently, e-commerce has grown tremendously and this is observed when increasing numbers of people are reported to use online services. Online shopping goes up due to the fact that people are interested in new and unique things and e-commerce is the only platform that they can realize this and the people gain experience as they familiarize themselves with online services. A study done by Comscore states that when shoppers are experienced and comfortable with the services offered, spending shoots up increasing the use of internet services (Kotler, 2009). Unfortunately, as the transactions are taking place, many inconveniences arise. Many issues affect online transactions and e-commerce in general. Security is one of these issues that sometimes make users shy away from internet services.

Required;

- Discuss any six (6) security issues that E-commerce users face in their quest for online services and transactions. [12 Marks]
- Discuss the key security measures that need to be instituted by the e-commerce companies to ensure their customers get their much-anticipated online trading /shopping experience. [8 marks]
- How does e-commerce security affect the volume of online transactions? [5 Marks]
