

MAKERERE UNIVERSITY
MAKERERE UNIVERSITY BUSINESS SCHOOL
FINAL EXAMINATION FOR BACHELOR OF BUSINESS COMPUTING OF
MAKERERE UNIVERSITY, ACADEMIC YEAR 2024/2025

COURSE NAME: INTERNET CONCEPTS & WEB DESIGN – SHIFT ONE

YEAR OF STUDY: II

SEMESTER: I

TIME: 9AM – 11AM

COURSE CODE: BUC2124

DATE: DECEMBER 1, 2024

INSTRUCTIONS

- i) This is a practical examination. Create a folder on the desktop in your name and registration number where all your project files will be stored. *For example, if your name is James Mwanga and your registration number is 22/U/5432/PS, your folder name would be jamesmwanga22U5432PS. Notice that there are no spaces or forward slashes in the folder name. Any file saved outside this folder can't be accessed for assessment.*
 - ii) Continuously save your work to avoid any interruptions in case of power outages.
 - iii) All resources needed (photos and videos) are provided on the desktop in the resources folder. Copy and paste inside your project folder.
 - iv) Don't write on this question paper. All other university examination guidelines still apply.
-

Question

You have been tasked with creating a responsive website for *Meet*, a social media platform that connects users through group chats and video calls. The website is one paged i.e. **Home Page** introducing the platform and featuring a prominent download button, a **Features Section** highlighting key functionalities like secure messaging, screen sharing, and video calling with descriptive cards, and a **Sign-Up Section** where users can create an account by entering their name, email, and password. Additionally, a **Footer Section** should provide links to social media platforms (Twitter, Google, and YouTube) and include a brief note on the platform's quality and reliability.

You have been provided with the website designs for both desktop view and mobile view in the `website_design` folder inside the resources folder i.e. **DesktopView.jpeg** and **MobileView.jpeg**. You're required to use these designs as your reference when developing the website to meet the stakeholder expectations. Use the necessary HTML and CSS to come up with the website designs provided. For CSS, you're free to write your own CSS or use Bootstrap CSS framework (provided in the resources folder) or both.

Note: The images in the `website_design` folder i.e. **DesktopView.jpeg and **MobileView.jpeg** are for reference only. Use them as a guide for how your website should look, but do not include these images on your webpage.**

Further Design Specifications

- a) Font: 'Trebuchet MS' for all text
- b) Body Background Color: #fafafa
- c) Button Background Color: cadetblue
- d) Paragraph Text Color: Gray

Website Designs (Check the resources folder for a clear design)
