- Your report should be well formatted e.g. line spacing should be 1.5, paragraph justified page numbered and etc.
- The rest of the examinations rules and regulations apply.

TAKEHOME ASSIGNMENT (30 MARKS)

A System Administrator is responsible for managing and maintaining all computer systems within an organization.

a) As a student in System Administration, you need to research and identify the current systems used at Makerere University Business School, your workplace, or any organization of your choice. Write a detailed report on each system, describing its functions and purposes.

b) Determine whether these systems are located on the university's premises or hosted in external data centers. Investigate the reasons behind the decision to house them in these locations.

c) Identify the qualifications needed for a systems or network administrator within your chosen organization. Outline the duties and responsibilities associated with this role. Based on your analysis of these qualifications and responsibilities, evaluate your own skills to identify what you already possess and what additional skills you need to develop to become an effective system and network administrator.

Note: For section c, each student should list their current skills and those they need to acquire to excel in the role of a system and network administrator.

End of the Assessment
